

## Clear2View

### Access Gateway Advanced

**Citrix Access Gateway Advanced™** provides the enterprise with granular situational based access to internal resources. Audit logs collect events such as end point analysis scan results, authentication events, and the resources users have accessed.

These audit logs whilst comprehensive have been inaccessible to many businesses due to the complexity of the data recorded and the lack of an out of the box solution to present the logs into well formed and automated reports. In today's climate of regulation and compliance, reporting is a necessity not a luxury.

#### **Benefits of Clear2View™ for Citrix Access Gateway Advanced:**

Clear2View™ for Citrix Access Gateway Advanced lets you extract the information you need from the Audit logs and present it easily to those that need it.

#### **AUDIT REPORTING**

- **Harvest** audit information from the Citrix Audit Logs on each server in your farm
- **Store** the formatted events into a separate database
- **Record** the Citrix published applications launched
- **Automatically** report upon the audit events and email them
- **Enable** customised reports using industry standard report tools
- **Export** data in .csv and w3c log format if required

#### **WEB ACCESS MODULE**

- **Browser** based access to key reports
- **Administrative** rights not required to access reports
- **Helpdesk** access
- **Solve** end user support issues

#### **END USER FEEDBACK**

- **Provide** users with details of their end point scan results

#### **MORE INFORMATION**

**Clear2View** for Citrix Access Gateway Advanced installs as a service on any Windows 2003 server in your AD Domain. At regular intervals, it will poll and collect changes in the Audit Logs, process the events and write them to a SQL 2000 or SQL 2005 database.

**Clear2View** does not alter or change the original logs, which can be archived for compliance.

#### **Licensing**

**Clear2View** is licensed in the same way as Citrix Access Gateway Advanced. For each Citrix AGA CCU you have, you will need a corresponding Clear2View license.

Clear2View Web Access is a single price module.
